

LAITOR INVEST LIMITED

Company Profile

1. Overview

Laitor Invest Limited is a technology-driven infrastructure and digital services company building an integrated ecosystem that combines internet connectivity, enterprise software, digital commerce, and field service execution.

Through its SlimISP model, Laitor operates a distributed network of connectivity zones, managed service platforms, and marketplace systems that serve residential, SME, and institutional customers across Kenya.

The company is designed as a **centralized operating platform for multi-sector service delivery**, connecting customers, service providers, and product suppliers through a unified digital and field execution system.

2. Vision

To become Africa's leading distributed digital infrastructure and services platform, enabling seamless access to connectivity, technology services, commerce, and essential digital solutions.

3. Mission

To connect people, businesses, and service providers through a unified ecosystem that integrates internet access, software systems, marketplace commerce, and on-demand technical services.

4. Core Business Model

Laitor operates a **multi-layer platform model** consisting of four integrated pillars:

4.1 Connectivity & ISP Infrastructure (SlimISP)

- Hybrid fiber, GPON, and wireless hotspot networks
 - Zone-based ISP deployment model (SlimISP networks)
 - Local gateway routing with cloud-based management
 - Residential, campus, SME, and rural internet services
 - Average revenue per user: KES 600 – KES 2,500+
-

4.2 Digital Platform & Systems Layer

A centralized software ecosystem managing all operations:

- Twenty CRM – customer intelligence and sales pipeline management
 - TelVoIP – call center, telesales, SMS, WhatsApp outreach
 - Manager.io – financial management and accounting
 - Uzange eCommerce – multi-supplier marketplace and order system
 - AI chatbot – customer engagement and lead qualification
-

4.3 Marketplace & Commerce Ecosystem

A supplier-integrated, asset-light distribution model:

- No inventory holding model
 - Multi-category supplier partnerships
 - Product and service listings on e-commerce platform
 - Markup-based revenue model
 - Categories include:
 - ICT & networking equipment
 - CCTV & security systems
 - Smart home solutions
 - Insurance products
 - ERP & software systems
 - FMCG and industrial goods
-

4.4 Field Service & Execution Network

A distributed on-demand workforce model:

- Installation teams (fiber, CCTV, access control, smart systems)
 - Maintenance technicians
 - Dispatch and logistics coordination
 - Pay-per-ticket execution model
 - Regional contracted partners and agents
-

5. Customer Acquisition Engine

Laitor operates a structured outbound and inbound sales system:

- Prospect database of 100,000+ potential customers
- TelVoIP-powered cold calling system
- SMS, WhatsApp, and email follow-ups

- CRM-based lead tracking and nurturing
 - Telesales conversion teams
 - Cross-selling and upselling across all services
-

6. Partner Ecosystem

Laitor operates a commission-based partner network across multiple industries including:

- WiFiPay – ISP billing and network systems
- Infotech – ERP and CRM implementations
- Cyberscape Development Kenya – software development services
- Covernet Insurance Agency – insurance distribution
- Insurance Supermarket – policy aggregation
- School and hospital ERP providers
- EcoGreen Honey – FMCG distribution
- Teck Pack – industrial packaging solutions

All partners operate under a shared customer acquisition and fulfillment framework.

7. Revenue Streams

Laitor generates revenue through:

- Internet subscriptions (ISP services)
 - Software and system deployments (ERP/CRM)
 - Marketplace commissions (product and service sales)
 - Installation and maintenance fees
 - Partner referral commissions
 - Managed service contracts
 - Franchise/operator network fees
 - Telesales and lead conversion services
-

8. Operational Model

Laitor uses a hybrid structure:

- Centralized platform and management systems
 - Decentralized field operations
 - On-demand technical workforce
 - Regional operators and franchise-style network expansion
 - Automated billing and commission tracking
-

9. Competitive Advantage

- Integrated ISP + marketplace + SaaS + field service model
 - Asset-light product distribution
 - Large prospect database for rapid conversion
 - Hybrid infrastructure (fiber + wireless + satellite)
 - Multi-industry partner ecosystem
 - Strong cross-selling capability across services
-

10. Strategic Outlook

Laitor Invest Limited is evolving into a **national digital infrastructure and services platform**, positioning itself at the intersection of:

- Telecommunications
- Enterprise software
- Digital commerce
- Field service management
- Financial and insurance distribution

The long-term goal is to build a scalable ecosystem that enables regional operators and partners to expand services efficiently across Africa.

11. Conclusion

Laitor Invest Limited is not a single-sector company. It is a **multi-layer digital ecosystem** that combines connectivity, software, commerce, and field operations into one unified platform designed for scalable national and regional expansion.
